

I WANT TO KNOW - Overture Song

Have you ever held Nature in your hand?
Have you wanted to know, to understand?
What makes the air, what makes the land?
I want to know!

Have you wondered what happens when you breathe?
Or what happens to air when smoke stacks heave?
What keeps us alive, keeps us healthy?
I want to know!

I want to know what makes us heal.
I want to know who it was that invented the wheel.
The light bulb! The automobile!
I want to know! I want to know!

Have you wondered what lives beneath the sea?
Do you know what makes electricity?
Can you define "reality"?
I want to know!

Have you wanted to see beyond the stars?
Make things better for us than what they are?
Can you imagine something more?
I want to know!

I want to know what makes us move.
I want to know what to do when I've something to prove;
Get in the groove.
I want to know! I want to know!

Curiosity's said to've killed the cat.
But was satisfaction that brought him back.
Not knowing makes a Scaredy Cat.
I want to know! I want to know!

Wanting knowledge will make your spirit soar!
Having knowledge will unlock every door.
Then you'll be coming back for more!
I want to know!

I want to know how I can fly.
I want to know what makes the Sun burn bright in the sky.
To simplify: I want to know. . .want to know why!

By Science. With Science. Through Science we will know.
From Science, real Science, we'll come to know.

I want to know. Oh yes, I WANT TO KNOW!
